* Note the discontinued products are Milan branded products and the replacements are Transition Networks branded products.

** Note the CGETF101x-105 converters provide a functional replacement for the discontinued C6000 series. While these are still slide-in-card modules, they require the use of a Transition Networks Point System Chassis.

Closing:
We look forward to new opportunities to support your networking requirements with our comprehensive product line. Please note that if you currently have open orders with the above discontinued products, these orders must be converted to the appropriate recommended / alternate replacement products listed above. Should you have any questions, please contact your sales representative.

Sincerely,

Transition Networks Management Team
