

Federal Government Capabilities

Transition Networks has been an industry leader in evolving networks of all kinds for over 30 years. This expertise has resulted in a broad portfolio of solutions that allows for cost-effective integration of fiber into any data network, supporting multiple protocols, and accommodating multiple interfaces to suit nearly any application. The Transition Networks team also works closely with customers to develop custom designs for new, modified, and integrated solutions in very specialized applications.

Using a consultative approach to understanding customer problems supported by strong agency relationships, Transition Networks has long been a trusted partner of the Federal Government. Transition Networks is headquartered in Minnetonka MN, U.S.A. and provides worldwide technical support. Transition Networks is also ISO 9001 quality system certified, provides TAA compliant products that are 99.4% free from defects, and offers a lifetime warranty on most products.
