

Switch Manager TNMobileApp Release Notes

Date: 09/24/2019

Version: 1.0

Overview

This release note covers the requirements, important notes, and known limitations for the TN Mobile App used with the SESPM1040-541-LT-xx Series Self-Enclosed Managed Hardened Gigabit Ethernet PoE++ Switch.

The App can be used on a mobile phone or tablet equipped with an Android-based Operating System, NFC reader and BLE capability.

Requirements:

Version 1.0 and these release notes apply to the following products:

- SESPM1040-541-LT-AC-xx

Known Issues:

- Cannot restore/upgrade switch firmware from the Mobile App. (Longer commands such as this should be done in UI or via connected console.)

New Features in this Release:

- Within **Initialize**, the *Inventory* tab allows the user to read the contents of the NFC tag.
- Within **Initialize**, create Configurations with DHCP Enabled IP address.
- Under **Troubleshoot**, added *Reboot Device* button functionality.
- Under **Troubleshoot**, pre-screening of devices for BLE pairing has been added to display only Transition Networks PoE++ switches.
- Within **Troubleshoot**, the *Username* and *Password* fields are now active.
- Added version number of mobile app displayed in upper right of screen.

New Features in Development:

The following is a list of new features and enhancements in development:

- Within **Initialize**, the *Files* tab is a placeholder for future enhancements.
- Within **Initialize**, in the *Transfer* tab, the *Export* button is a placeholder for future enhancements.
